Dear Manager,

Data-driven decisions are the best course of action for any business, that's why Data Science is used today in almost every industry which is flourishing today. So knowing Data Science is an imperative tool for this day and age. That's why I would be thrilled to work as a Student Assistant in this domain. I am a master's student at RWTH Aachen studying media informatics.

During college time, I engaged in a lot of competitive programming which I did in C++ and some college projects which I did in python and java. So I have experience in these languages. And prior to coming to Germany, I have worked in Samsung for 2 years, as a result of that, production-level software creation, team-work, ownership, and other nuances has been bestowed upon me. Last semester I finished courses on Data Science and Machine Learning, and I am ready to apply my knowledge in my work at the company. I have experience with python language which is we know the language to do Data Science or Machine learning-related research.

So due to all this reason I consider myself fit for this position, let me know what you think. I am looking forward to hearing from you.

Sincerely,

Praveen Yadav
